Professional Team

Healthcare Designers Limited(HDL) is a specialized firm focused solely on the design and construction of healthcare facilities. We have dedicated our time and resources to understanding the unique needs of healthcare environments, allowing us to offer expert solutions tailored specifically to hospitals.

With a commitment to quality and client satisfaction, we approach every project with the goal of creating functional, patient-centered spaces that facilitate efficient and safe healthcare delivery.

Our expertise in healthcare design sets us apart, making us the preferred choice for healthcare construction compared to general construction firms.

## Our Values

1. Innovation in Healthcare Design
2. Quality & Excellence
3. Integrity & Transparency
4. Client-Centered Approach
5. Sustainability

## Our Overview

### Design

We design thoughtful healthcare environments.

### Build

We build great hospitals

### Equip & Maintain

We support you to equip and Maintain your facility

# Our Services

We offer a comprehensive range of services tailored to our clients' specific needs, leveraging our extensive expertise in healthcare facility design and construction.

## HEALTHCARE FACILITY DESIGN

We specialize in designing patient-centric healthcare spaces that promote comfort, safety, and functionality. Our team of hospital consultants, architects, Interior designers, biomedical engineers and medics works closely with clients to understand their needs, ensuring every aspect of the facility aligns with clinical and operational requirements.

# 01

# 02

## CONSTRUCTION

From groundbreaking to project completion, HDL provides end-to-end construction services with a focus on quality and precision. Our construction team ensures that every phase of the project is meticulously executed, following strict timelines and budgets to deliver outstanding results.

## HOSPITAL SETUP

HDL offers comprehensive hospital setup solutions that transform healthcare facilities into efficient, modern, and patient-centered environments. Our approach goes beyond design and construction to include the digital infrastructure, such as electronic health record systems, smart technologies, and IT networks that enhance clinical and administrative workflows.

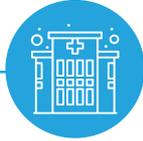

# 03

# 04

## HEALTHCARE CONSULTANCY

HDL provides consultancy services that encompass facility branding, site assessment, regulatory compliance and accreditation oversight, technology integration, hospital setup management, and maintenance of hospital spaces.

# Why HDL?

## Specialized Healthcare Expertise

As a firm solely focused on healthcare facility design and construction, HDL brings unparalleled expertise and insight into the unique needs of healthcare environments. Our exclusive specialization allows us to dedicate resources to understand and address the specific requirements of healthcare providers, setting us apart from general construction companies.

## Superior After-Sales Support

We stand by our work even after project completion. Our six-month maintenance program, followed by optional routine maintenance, ensures that every facility we build remains a top-tier environment that meets the highest standards for years to come.

## Expertise Working in Active Hospital Environments

We understand the complexities of working within operational healthcare facilities. Our team is adept at coordinating construction in active hospital environments, respecting the urgency, cleanliness, and precision required. We work efficiently and discreetly to minimize disruptions, always mindful of the sensitive needs of patients, staff, and visitors.

## Uncompromising Quality:

We believe a quality product is the best advertisement. Our team consists of highly skilled craftsmen dedicated to excellence, ensuring every detail meets our exacting standards. Our commitment to quality extends beyond project completion, as we strive to deliver lasting value in every build.

## Integrity and Dependability:

At HDL, integrity and fairness are the foundation of our business ethics. Whether collaborating with clients, suppliers, or our own team members, we believe in an unwavering commitment to honesty and trustworthiness. Honesty isn't just our policy, it's our principle.

# Our Portfolio

Since 2015, Healthcare Designers Limited has successfully designed, built, equip, maintained and handed over 60 hospitals across 30 counties in Kenya. These facilities collectively house more than 13 fully functional departments, including theaters, consultation rooms, imaging centers, emergency units, laboratories, and inpatient areas.

Below are some of our notable projects, organized by region :

## 01 Nairobi

Green House Mall - Oasis Doctors Plaza

Plaza Kitisuru - Oasis Mental Hospital

South B- Ganana Hospital

Oasis Healthcare - Makadara Hospital

Ngara Yunex Healthcare

Parklands - Medecode Hospital

South C - Reliance Hospital

# Notable Projects

## OASIS HEALTHCARE GROUP

HDL has proudly partnered with Oasis Healthcare Group on over 30 of their facilities, delivering comprehensive services that span design, upgrades, and facility improvements. Our work focuses on creating functional, patient-centered spaces that meet the highest standards of healthcare design. We remain dedicated to collaborating with Oasis Healthcare to consistently deliver quality results that elevate their facilities and reinforce their commitment to exceptional patient care.

# Major hospital departments we have designed and built for OSH hospitals:

Outpatient Department (OPD)

Pharmacy

Eye Clinic

Administration & Support Services

Emergency & Trauma Unit

Operating Theaters

Specialist Clinics

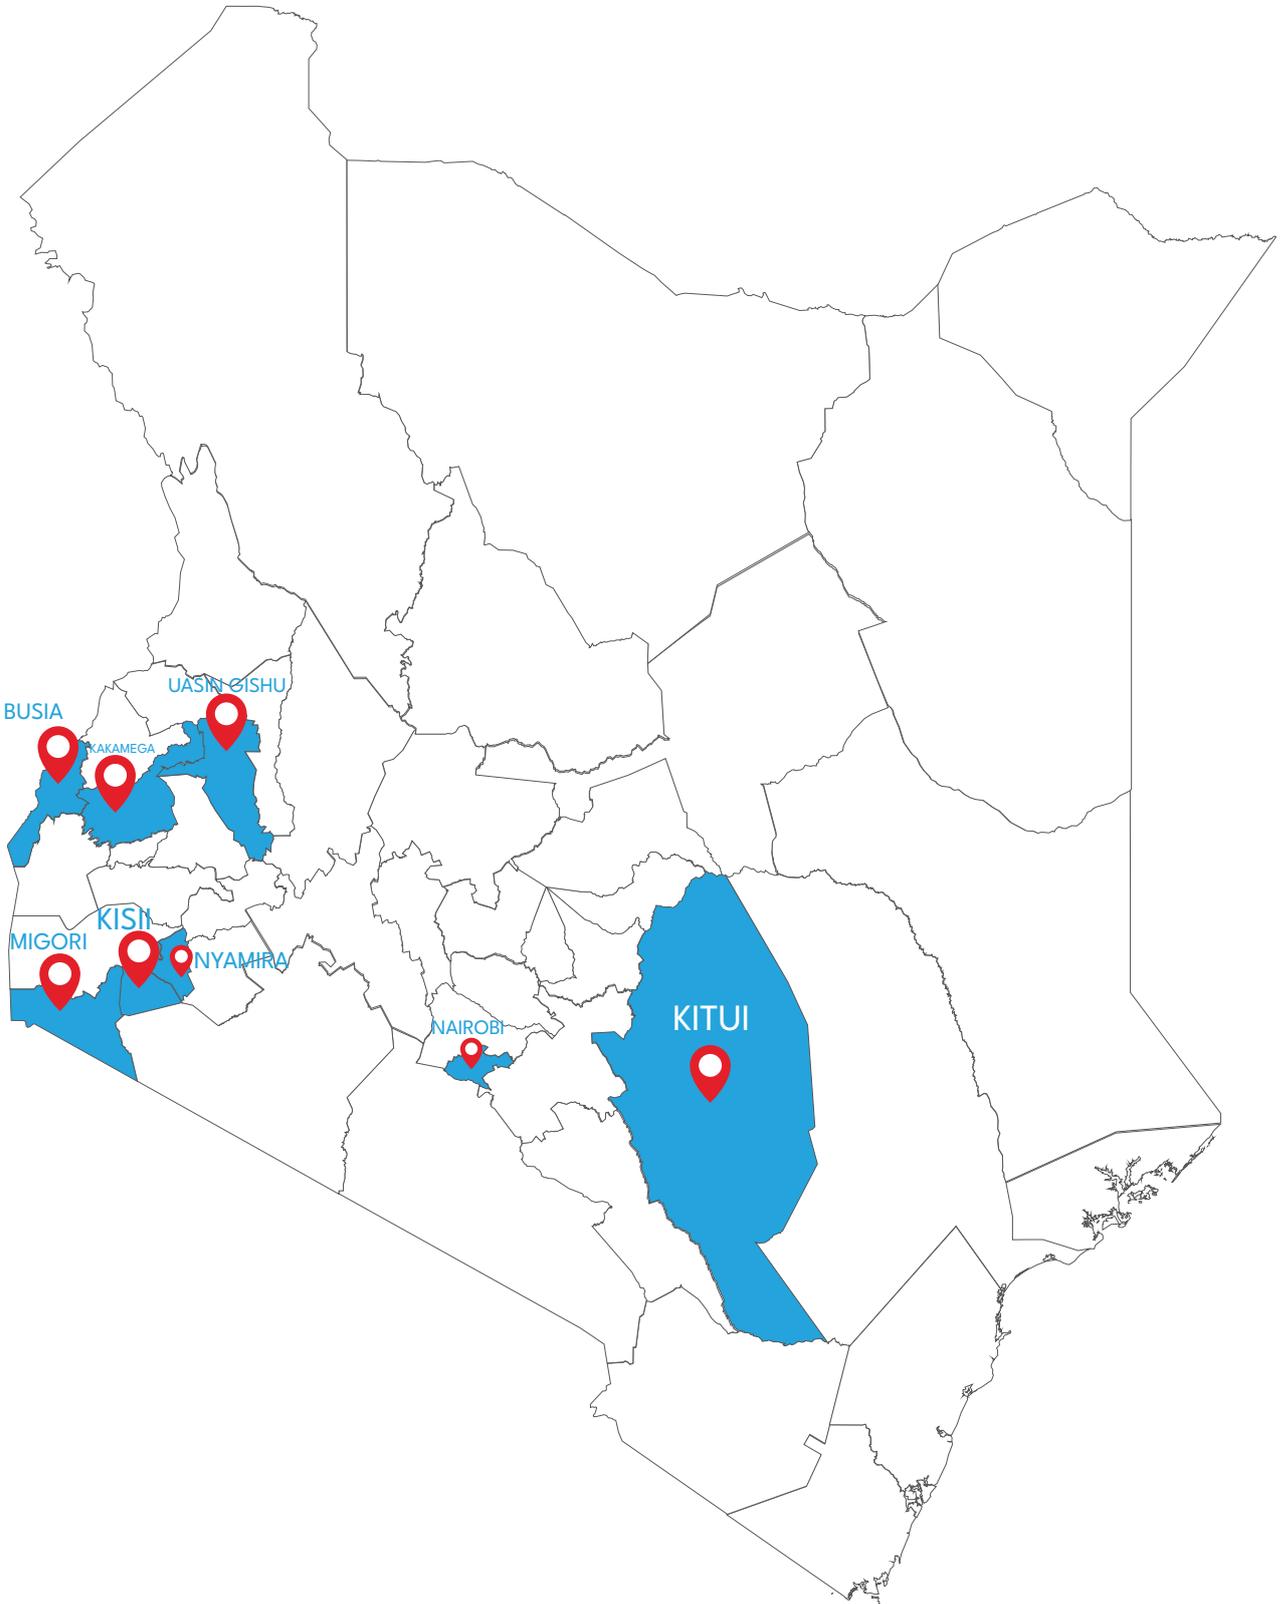

Inpatient Wards

Physiotherapy & Rehabilitation

## OSH hospitals branches done by HDL:

## FAITH MOTHER AND CHILD, KAMAKIS

The true essence of this Mother and Child Hospital is not just in its structure, but in the thoughtful design and interiors that shape a healing environment. Every brick laid, every space planned, and every detail crafted is dedicated to creating a sanctuary where care, comfort, and life itself can flourish.

# THE PROCESS

## Designing process

We took time to carefully design every aspect of the hospital, ensuring that each space would serve its purpose with efficiency and comfort.

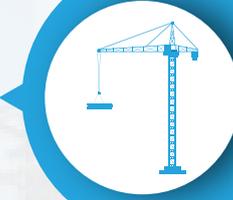

STEP  
01

STEP  
02

## Building the Structure

As we progressed from groundbreaking, the next major phase was constructing the robust structure that will support this state-of-the-art facility.

## Progressing to Interiors

Our dedicated team of architects and interior designers is carefully crafting spaces that blend comfort, functionality, and aesthetic appeal.

STEP  
03

STEP  
04

## Looking Ahead

As the project nears completion, the Mother and Child Hospital Kamakis is set to become a cornerstone of maternal and child health in Kiambu County.

03

## TAYIBA MEDICAL CENTER, KISUMU

---

HDL has been instrumental in developing Tayiba Hospital, managing projects from groundbreaking to completion. Our work includes a fully-equipped surgical theater, an outdoor laboratory, a hospital canteen, VIP private rooms, as well as outdoor curo paving and parking. With several upcoming projects in the pipeline, we remain committed to delivering high-quality healthcare spaces tailored to the hospital's evolving needs.

## Key Exterior Features:

- Wide, barrier free entry for wheelchairs and stretchers
- Durable wall finishes for long-term weather resistance
- Canopy structure for patient and staff protection
- Clear site branding and signage space allocation

## Reception Interior Layout & Finishes

The interior image reveals a clean, minimalistic clinic reception layout optimized for flow and efficiency. The design includes a central reception desk with wide visibility, streamlined patient pathways, and ergonomic seating arrangements that support all-day comfort.

## Interior Design Highlights:

- Open plan layout with visual clarity for visitors.
- Hospital grade finishes for hygiene and easy maintenance
- Neutral colors with warm lighting for a calming atmosphere
- Integrated MEP (mechanical, electrical, plumbing) systems for efficiency
- Space zoning for waiting, staff entry, and check-in stations

04

## PANAFRIC UNIVERSAL HOSPITAL

“TRANSFORMING A  
COMMERCIAL BLOCK INTO A  
MODERN MEDICAL FACILITY”

Designed by Healthcare Designers Ltd, this project reimaged an existing commercial block in Kiambu, once occupied by rental units and shops into a fully equipped, compliant Level 4 healthcare facility. Commissioned by Panafric Universal Hospital, the transformation enhances local access to essential medical services in a modern, patient-centered environment.

[www.healthcaredesigners.co.ke](http://www.healthcaredesigners.co.ke)

## Design Intent and Impact

The main objective of this project was to maximize the functional output of a previously commercial space, adapting it into a high-performance medical facility without compromising on spatial quality or regulatory compliance.

This redesign supports:

- Patient-centered care through intuitive layouts and efficient space usage
- Staff well-being via circulation clarity and dedicated operational zones
- Community access to healthcare in a central, familiar location
- Future upgrades, with core systems and structural provisions in place for expansion

Client: Panafric Universal Hospital  
Location: Kiambu, Kenya  
Scope: Design & Build

## **05** POLYCLINIC AND DIAGNOSTIC LEVEL 4 HOSPITAL

“From Rental Spaces to Purpose-Built Hospital Design”

A modern Polyclinic and Diagnostic Level 4 Hospital in Mombasa County, Nyali, featuring an Emergency (A&E) unit with triage and MD office, central nurse station, consultation room, ultrasound suite, dual-dispensing pharmacy, inclusive washrooms, vertical circulation with lifts, and a streamlined waiting and reception area.

### The Impact:

#### Healthcare That Works for the People

With healthcare demand on the rise in coastal Kenya, this facility ensures that residents have timely access to emergency care, diagnostic imaging, and clinical services without long travel or wait times. Its hospital reception area, lifts, and triage spaces mirror those found in top-tier global hospitals.

Whether you're a hospital investor, government health planner, or facility manager, this project demonstrates the value of working with hospital architecture firms that understand both global healthcare design trends and local community needs.

### Designed by Healthcare Designers Ltd (HDL)

This project was fully envisioned, designed, and executed by Healthcare Designers Ltd (HDL), Kenya's trusted name in medical facility architecture. HDL's portfolio spans across Nairobi, Kisumu, Mombasa, and beyond, with a reputation for elevating public and private healthcare facilities through design excellence.

From concept development, architectural planning, hospital spatial layout, and contractor coordination, HDL provided end-to-end hospital design services. This Mombasa Level 4 project is now a flagship example of how functional aesthetics and operational strategy can work hand in hand.

### Compliance and Structural Integration

A standout feature of this project was its seamless integration of mechanical, electrical, and plumbing systems (MEP). Coordinated in advance with consultants, the layout ensured every inspection chamber, foul drain, and vent pipe followed Nairobi County and Mombasa municipal building codes.

Location: Mombasa County, Kenya

Project Type: Commercial to healthcare facility conversion

Developer: Healthcare Designers Ltd (HDL)

Services Offered: Hospital architectural design, medical space planning, MEP coordination, healthcare construction, MoH compliance

06

## MEDSPLY HOSPITAL

“From Commercial To Critical Care.”

Medsply Hospital in Mumias was transformed from former retail shops into a fully functional Level 3B healthcare facility, featuring redesigned clinical spaces, improved patient flow, and essential medical infrastructure to serve the local community with accessible, modern care.

### Before and After: A Vision of Possibility

**Before:** An aging commercial block with no medical functionality.

**After:** A fully equipped, patient centered Level 3B hospital with consultation rooms, triage areas, wards, a pharmacy, and diagnostics.

## Design Philosophy:

Function, Flow, and Healing

From flooring to lighting, and spatial layout to ventilation, every detail is designed to create a clean, calm, and healing environment. HDL has applied principles of hospital interior design to ensure that the facility meets both clinical needs and emotional well-being.

## Key Features of the Mumias Hospital Design Include:

- Spatial optimization: Smart zoning for patient flow, staff movement, and emergency access
- Natural and artificial lighting: Designed to reduce patient stress and improve visibility
- Durable materials: Easy-to-clean flooring and antimicrobial wall finishes
- Clearly defined areas: Separate outpatient, emergency, and pharmacy spaces
- 3D visualization: Interactive previews ensure client confidence and early approvals
- Sustainable choices: LED lighting, natural ventilation, and water-saving fixtures

## MEDECODE HOSPITAL

A commercial property in Nairobi has been transformed into Medecode Hospital - a fully functional Level 4 healthcare facility. Designed and built by HDL, the project includes specialist departments, advanced diagnostics, a central nurse station, and efficient patient flow systems delivering modern, compliant, and future-ready healthcare infrastructure.

“A State-of-the-Art Healthcare Facility Built for the Future.”

## Project Scope and Specialties

Healthcare Designers Ltd provided end-to-end services for this hospital.

These included architectural planning, construction, interior design, and healthcare compliance consulting. Our team of healthcare constructors managed every detail, including:

- Zoning of departments
- Patient and staff workflow planning
- Accessibility enhancements
- Installation of medical-grade materials
- Energy-efficient utilities
- Water-tight flooring and wall finishes

## Interior Design and Patient Experience

As certified professionals in hospital interior design, we focused on optimizing lighting, color psychology, and material selection. The goal was to create a healing environment that lowers patient stress while improving navigation and hygiene.

From the choice of flooring to modular furniture, the interiors are easy to maintain, disinfect, and reconfigure.

## RELIANCE HOSPITAL

“Modern Hospital Architecture with a Human Touch”

Reliance Hospital is undergoing a significant upgrade, enhancing critical care services including pediatric units, operating theatres, and ICU facilities. Designed and built by HDL, the improvements ensure modern, patient-centered spaces with efficient medical workflows and improved functionality to support quality healthcare delivery.

## Designing a Space That Heals

This project was more than an interior upgrade it was a testament to how modern hospital architecture can shape patient experience and emotional recovery. We applied principles of biophilic design, incorporated natural light, and focused on sensory comfort to enhance psychological well-being.

The result was tangible. Visitors naturally gravitated toward the areas that suited their emotional needs. A parent consoled a child under soft lighting. A patient quietly watched birds glide in the aviary.

Two strangers shared a conversation that sparked empathy and relief. These small moments validated that the space wasn't just built, it was felt.

Reliance Hospital Nairobi's waiting area now stands as an example of how thoughtful, modern hospital architecture can go beyond clinical norms and foster an environment of peace, dignity, and healing.
